DETAILED ACTION

Claim Objections

1. Claims 1-5 are objected to because of the following informalities: in claim 1 it appears that the term "terrerae" is misspelled and should be – tesserae --; in claim 5, line 4, the phrase "all substantially all" is grammatically incorrect; in claim 2 there is no antecedent basis for the term "the flat support", and in claim 5 there is no antecedent basis for the terms "the rigid support" and "tesserae fixture". Appropriate correction is required.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2 and 5 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Born 2001/0031336. See paragraphs [0030], [0036] and [0046].

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Born. The reference discloses the invention substantially as claimed; see paragraphs [0030], [0036] and [0046]. However it does not disclose the claimed shape of the laminate. It would have been obvious to one of ordinary skill in the art to vary the shape of the laminate disclosed by Born depending on the area to be covered for a particular end use.
